

CB Coconut oil (Raw Coconut Oil)

Product description

CB Coconut oil (crude and bleached) is considered lauric due to its high content of fatty acid, ideal for the manufacture of soaps, cosmetics and personal care products.

Ingredients

100% raw coconut oil.

Applications

Chemical:

- Manufacture of soaps.
- Cosmetics.
- Personal Care.

Characteristics

- 100% vegetal.
- Non-hydrogenated.
- Hot pressed.

Additional qualities

Coconut oil is one of the most stable oils of nature and is extracted from: "copra" (coconut marrow).

It is an oil called lauric, for its high component of this fatty acid, it has a high saponification point, which makes it one of the best options for the manufacture of soaps.

Due to its own characteristics it is much appreciated as a raw material in the elaboration of oils for corporal, cosmetic and personal care therapeutic treatments.

Product lifetime

12 months from date of manufacturing.

Industry

Chemical (cosmetic and personal care).

Presentation

18,5 L / 17 g bucket.

180 Kg barrel.

1 T tote.

15, 25 1nd 30 T bulk (tanker)

OLEOFINOS™

EAT HEALTHY
