

## Palm Oil RBD

### Product description

The crude palm oil is obtained from the pulp of the fruit of the African palm and to obtain a RBD oil (*with food grade*) a refining, bleaching and deodorizing process is carried out.

### Ingredients

100% RBD palm oil.

### Applications

#### Food:

- Formula.
- Snacks.
- Instant soup.
- Sour cream.
- Margarines.
- Ice cream base.
- Cheese makers.

#### Chemical:

- Manufacture of soaps.

### Characteristics

- Healthy oil.
- 100% vegetal.
- Non-hydrogenated.
- Free of trans-fatty acids.
- Cholesterol-free.
- Free of unpleasant odors and tastes.

### Additional qualities

Due to its profile of fatty acids and its high content of palmitic fatty acid is one of the most versatile and stable oils in the food industry. Thanks to its neutral flavor it allows to highlight the characteristics of the food in which it is used.

It contains natural antioxidants such as beta-carotene, tocopherols and tocotrienols that are beneficial for health.

Palm oil is ideal for the manufacture of all types of soaps, its melting point between 22°C and 48°C allows it to be fractioned to take advantage of the physical-chemical characteristics of each of its fractions.

### Product lifetime

6 months from manufacturing date.

### Industry

Food and Chemical  
(Cosmetic and Personal Care).

### Presentation

18.5 L / 17 Kg bucket.  
180 Kg drum.  
1 T Tote.  
12, 25 and 30 T bulk (tanker)
