##### Chemical:

- Chemicals.
- Cosmetics.
- Soaps.
- Alkyd paint.

#### Characteristics

- Healthy oil.
- 100% vegetal.
- Non-hydrogenated.
- Free of trans-fatty acids.
- Cholesterol-free.
- Free of unpleasant odors and tastes.

#### Additional qualities

It is a lauric acid, extremely stable, with a melting point of approximately 24°C so that above that temperature is liquid and below it behaves like solid fat.

In the food industry for its natural qualities, it has a very wide compatibility with the flavors of the food in which it is used.

In the chemical industry its high saponification index makes it the ideal oil for the manufacture of all types of soaps.

#### Product lifetime

12 months from date of manufacturing.

#### Industry

Food, Chemical and Cosmetic.

#### Presentation

18.5 L / 17 Kg bucket.
